Comments: Couldn't figure out how to post a testimonial so here goes;

Arthur:

All we can say is you did an excellent job on our replacement gutters and the screening. The old gutters were not sloped properly, held water and bred mosquitoes. After my new roof was installed they were literally destroyed and filled up with construction debris.

Not only did you do a great job on the new gutters, you spotted rotten fascia before you even started the project that the roofer was supposed to have fixed. Needless to say I'm not providing my roofing company with a testimonial.

Putting up my Christmas lights this weekend and the gutters are dry as a bone. You did exactly what you promised, did the work when you said you would and for a reasonable price.

Will recommend you to everyone we know, great job, thanks for everything.

Mike and Nancy Davila
