Attention: Arthur Kaufman, Pres.

Dear Arthur,

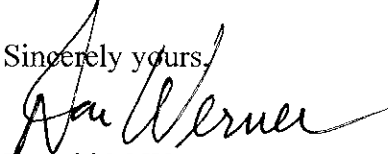

I am writing this letter to express our appreciation to you and your most professional staff for the excellent installation of our entire gutter system that your company recently installed. We are delighted with the workmanship and extreme care that was exerted resulting in a very beautiful and functional installation.

Although I am a graduate mechanical engineer and spent my professional career initially in the aircraft industry but mainly in the Werner Ladder Company, I did not pay enough attention to the initial installation of our home gutter system until our problems occurred. We found the prior installation of our gutters faulty causing many areas of rot from rainwater washing behind the gutters instead of into the gutter. Your installation corrected this problem as well as several other problems that you and your staff discovered.

I particularly appreciated your personal involvement insuring that every detail aspect of the installation was perfectly done. Some of these items included raising all new gutters to properly catch the runoff, proper selection of nails that would not back out, filling all old nail holes to avoid insect infestation and redesigning the slopes for proper drainage.

I will highly recommend your company to any one in need of either new gutters or replacement gutter systems.

Sincerely yours,

Donald M Werner
